FN2317

HandBrake Load Cell

SPECIFICATIONS

- ◆ Ranges 500 N and 1000N (100 and 200 lbf)
- ◆ Compatible with most handbrakes
- ◆ “Easy to mount” through clamping collars
- ◆ High accuracy $\pm 0.5\%$ FS

The **FN2317** is designed with the purpose of allowing quick and easy installation when measuring forces applied to the handle of the hand brake in automobiles. Clamping collars facilitate the prompt and uncomplicated installation of the load cell under the hand brake. As such, the **FN2317** is compatible with most models of hand brakes.

Through careful placement of metallic strain gages inside, the sensors provides accurate measurements regardless of the point of application of force.

With many years of experience as a designer and manufacturer, TE Connectivity (TE) offers solutions to automotive industry and can supply standard or custom sensors for specific uses and testing environments.

On request, Instruction documents can be provided to ease the selection and use of our sensors and provide helpful tips.
